HIMSS 2025 Global Healthcare Technology Summit KMUH's Smart Healthcare Achievements Shine Internationally

The annual HIMSS 2025 (Healthcare Information and Management Systems Society) conference, a leading global healthcare technology event, took place in Las Vegas, USA. Kaohsiung Medical University Chung-Ho Memorial Hospital (KMUH) was invited to participate, showcasing Taiwan's cutting-edge smart healthcare advancements on the international stage. KMUH engaged in in-depth discussions with global professionals, exploring how AI-driven medical technology can advance digital transformation in healthcare institutions and fostering opportunities for international collaboration.

KMUH also joined the Taiwan Pavilion, highlighting the soft power of Taiwan's medical device industry and boosting the global visibility of its smart healthcare products and technologies. Through this prestigious event, KMUH aims to align with global healthcare trends, unlocking new possibilities for smart healthcare to enhance medical quality and benefit communities worldwide.

At HIMSS 2025, KMUH's smart healthcare achievements captured global attention.
